DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 21-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Kraus et al. (US 6,280,253 B1).

Regarding claim 21, Kraus et al. disclose a fuse module comprising:

a plurality of fuse pieces (93), each including a plate-shape input and output terminal (94, 94);

a fuse casing (72) made of insulating material and including a plurality of fuse mount holes (92) that separately receive the fuse pieces; and

tab terminals (42-64) incorporated in the fuse casing and electrically connected with the output and input terminal respectively (see Figure 1).

Although Kraus et al. do not specifically disclose a fuse element connected between the input and output terminal of the fuse piece. This feature is seen to be an inherent teaching of that device since a fuse piece is disclosed and it is apparent that some type of fuse element must be present for the fuse piece to function as intended.

Art Unit: 2833

Regarding claim 22, Kraus et al. disclose busbars (99, 101, 110) connected with the tab terminal.

Regarding claim 23, Kraus et al. disclose the fuse piece is vertically mounted in the fuse mount hole and the tab terminals engage corresponding plate-shape output or input terminals.

Allowable Subject Matter

3. Claims 24-39 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is an examiner's statement of reasons for allowance:

Regarding claims 24-30, the prior art of record fails to teach a hole section for receiving the fusing element of the fuse piece.

Regarding claims 31-39, the prior art of record fails to teach a plurality of input connection terminal interpose and engage the input terminal and the tab terminals, and an output connection terminal interposed between and engage the output terminals and the tab terminals.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

5. Applicant's arguments with respect to claims 21-39 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
